

# Thermo Scientific Finnpipette F1 Pipette

Thermo Scientific™ Finnpipette™ F1 pipettes deliver performance with outstanding precision in a lightweight design that maximizes user comfort and reduces strain. It's the ideal system for applications using expensive reagents and valuable samples, thanks to its super blow-out feature for effective delivery of microvolumes, along with a secure volume-lock capability that prevents unintended volume shift during operation.

## Ergonomically In-touch

Lightweight handle design combined with low plunger, tip attachment and ejection forces help reduce the risk of Repetitive Strain Injury (RSI).

## Silent, Effortless Volume Adjustment

Enjoy the new silent and lighter volume adjustment mechanism with over 50% lower forces compared to earlier models. Improved grip on the volume adjustment knob ensures effortless and precise adjustment.

## Secure Volume Lock

The secure volume setting prevents undesirable volume drift during operation. Simply lift the plunger up to set volume and press down to lock in place with minimum effort.

## Adjustable Comfort

The 120° adjustable finger rest – for both right- and left-handed operator comfort – allows the hand to relax during pipetting cycles.

## Super Blow-out

150% increase in air boost to ensure efficient delivery of micro-volumes and prevent capillary action in 50 µL models and below.

\* Validity may vary by country.

## Wide Selection of Finntip Pipette Tips

Finntips are designed and manufactured expressly for Finnpipette models, enabling optimal performance, precision and accuracy.

## 5-Year Warranty

With convenient online registration\*.

The 120° adjustable finger rest
